When I first got the game, I was really excited for it. But the more and more I played it, I realized how horrible the game actually is. Even the players are horrible! The animation is just one cycle over and over and over. It's almost impossible to find totem poles and even make it to the next animal! I mean, the game would be a whole lot better if the players weren't such jerks! And I can't even communicate with them. I really think that this game needs ton of improvement. Like, you can host your own server and kick out players. Players who are even the same animal as you will try to kill you. Unless you like being killed constantly and never being able to get revenge, don't get this game! Please save your money.. An excellent and expansive follow-up to Brothers in Arms: Road to Hill 30.. Been looking for a game of this kind for years. It has a bit of a 'clunky' feel to it and things aren't always as straight forward as they could be. All in all a good game but vastly over priced in my opinion.. Despite its short length and bad graphics Lugaru has a great combat system and an interesting story.. I got dead, I guess? It was fun! Explore the battlefield after the fights for them sweet pearls and rubies.. I loved this game when it was fairly new, and I still enjoy it, though I do wish it would be remade as a smoother product. This was from Sid, so you know it's solid. The gameplay is a spy themed game that is a cross between Pirates and Where in the World is Carmen Sandiago? You stop plots that actually are going through actions, over time agents are activated, payoffs and equipment made. You can stop a plot by preventing key actions (if the assassin isn't paid, he ain't shooting anyone,) and using logic you can figure out the plots. The controls are slow, and the music and graphics are top notch for a game that is over 20 year old.. It's a good game. This was the game that got me started with Nancy Drew a long time ago. This game will always have a special place in my heart that much is for sure. I love the graphics and the story line is enjoyable and the puzzles not too difficult. A great game for anyone to enjoy.. Awesome software. highly recommended.

need to click many time before able to access the software

Ehh, mash potatoes are nice and so is this.. Out of all US locos this thing looks and quite possibly could be the best in all the DLC's. But, until the issue of it being the biggest resource hog in the, dare I say, whole inventory of TS DLC's, is fixed this loco will remain unplayed. Not by choice. But, because I can't get better than 7 FPS to 10FPS. And at times as low as 4. Very choppy. Unplayable for me. And some of you intent readers may think " Well this guys system is weak". For those I'll leave System Specs at the end.

I cannot recommend this DLC as much as I would love to and would also love to drive. Please DTM developers or Dovetail Games fix this DLC. If you have a really huge system then by all means get this DLC. But, if your system is moderate to fairly well built (where I consider mine to be) then be fairwarned of choppy framerates, even to the point of unplayability. It's still early with this one. So let's hope it's future is brighter. Peace!

Enermax Ostrog case

Thermaltake TR2 550w Power supply

Asus MB M5A99FX Pro R2.0

AMD FX 6300 APU

16GB Patriot Signature RAM

WD 1T HD with 64Mb cache

XFX AMD Radeon R7 250 w/ 2GB DDR3 DirectX 12 Overclocked to 1050Mhz

Assus 48X DVD RW

LG 55" LCD 1080p HD TV/Monitor. Hands down the most fun I've ever had in vr!. Lost some hours with this game.

Zonderland. Where to start...

This is a very odd collection of music. Very good, don't get me wrong, but more on that in a moment. Zonderland brings a style to the table you won't quite find in any other DLC music on steam. It manages to feel sci-fi without being alien to typical JRPG games. It takes a little head work to decide how to use this music well, but I assure you, if your good at setting scenes and need some music a little ways off the beaten path without feeling inconsistent, then I would try this DLC.

Now what I love about this is it's style. There is a lot to love, even if it's a little wierd to use correctly. And by wierd, I mean that you really don't want to reuse tracks, they're very signature feeling, and feel as though they in turn require a signature moment or place to be done justice.

What else I love, almost as much as the tracks themselves, is how well the artist looped them. They are one of the most artfully looped tracks I've downloaded (And I've gotten at least half the DLC music offered in steam's store.) You just can't tell when it loops back around.

Even if this music is hard to place sometimes, I can't really say it's a bad thing. So much of the music offered on Steam is more of the same, this set of tracks steps away from all of that and as such made it a necessity for my own project.

5/5 stars to the artist and this wonderful set of unusual tracks.. A game that is a kind of mix between Megaman and Gradius in a sense.

It's a simple little platformer that allows you to upgrade your abilities as you make your way through the stages.

Graphically it looks nice. I find the towns stages to be some of my favorites. But the platforming seems a tad bland and forgettable although alot of the enemies are cute.

There are a few modes of difficulty starting with easy x 2, casual and higher. I played it on casual and found the game to be way too easy and wishing it was more difficult by the third boss, of which I can easily dispatch in under a minute and you can't change the difficulty to anything harder than what you started with once you start the game.

Since the game has multiple weapons I feel it's time to talk about them. Outside of your primary weapons the liner and comet all other weapons are useless are more of a hinderance and not necessary. You can beat the entire game with just Linear and comet. Heck using the shop you can actually make it so you are overpowered before a stage even begins properly.

Overall it's kinda alright but the platforming is bland and every weapon outside of what you start with is useless to bad. But I've played worse, so give it a shot if you have a couple hours to spare.. Played the game at EGX a few moons ago. The one-

button playstyle, levels that bounce you, and the rail which gives you a chance to get back into the scrap leads to amazing moments of insanity.

The easy to learn, hard to master controls are perfect for multiplayer matches. New singleplayer thangs on the way, too, so if you play alone you'll be covered.. this game was acually very enjoyable to me :)! trully the grahpics are awesome and everything makes me think of the old mario when i play just with more cuteness lmao i highly reccomend this game tho it was Pawsome :3. Game is pretty good but has one huge issue - is already abandomed by devs. Few people are asking on forum about save file location and there is no feedback one week already.

So if you play on laptop and start playing on desktop - you start everything from zero. Save file is not in the cloud...

I can not recommend abandomed game, sorry.

Try our new game - Magic Chess!:

We're proud to announce that Magic Chess is now available on Steam for Windows PC and Mac!

Welcome the Magic World. Become a commander of wizards and magical creatures. Compete with your rival in logic skills, find solutions for difficult situations. Master tactics and strategy to lead your army to victory!

We'll be glad to see your feedback in comments!

Playloft Team

https://store.steampowered.com/app/876860/Magic_Chess/?beta=0. **Summer Sale - Achievement Machine 75% Off:**
