10 lets me rub Purple Heart's perfect chest~. Free to Play'

. I'm having fun with this game. You have to get past the cheesy beginning and into the caravan part before it gets interesting. After I put about two hours into it and figured things out it's a decent game. No award winner for sure, but decent on sale. Oh, and download the trainer if you want this game. Its hard to recommend a game you have to cheat at to play but there's some goodness here they just never finished.. Great platforming adventure, lovely graphics and an amazing soundtrack!

10V10. Great game for player that want to push their limits and Practice their reflex.. If you got duped into this game because you thought it was an RPG I feel bad for you. this is just a game where characters you dont control and are completely stationary act like towers that shoot at creatures that walk on roads. There are hundreds of versions of this game that are free to play. I recomend those instead.

I've just purchased it, but so far I'm happy. If you're heavily invested in Google's photo ecosystem and have Photospheres you'd like to view in your VR Headset this makes it really easy. Link your google account and boom! everything shows up with an easy to navigate UI.. the story is too short. i hope we can play until like, lv 90 perhaps. it would be great :)

overall, this game is great. not like nowadays game, full of hint. this game is tricky fun. No. Just no. You can make food, make the people shower or make them pick up socks and wrappers.

There have been NO UPDATES, no new content, no improvements.

This game was thrown together for the devs to make a quick 10\$.

Get the Sims.. at least its an actual game.. Why do i play this game i ask myself? It sure isn't the graphics here that is the reason. I suppose it's because this game has the 'one more try' and 'greed is good' mechanics built in really well as you try to grab as much goodies as you can from the mines without getting squashed by rocks or killed by bugs. There is a lot of 'C-C64 Boulderdash' mechanics here and that is good.

Equipment and randomly generated worlds keep things fresh nicely. Just dont buy this for the achievements unless you like them really hard.

Quite expensive on normal price but definitely worth discounted as a quick session game.. this game is a literal disgrace to this planet, the internet should have been kept for government use only. this is a version of binding of isaac, even the original BOI is better than this garbage. i'm not even trying to be a this is just utter trash and the people who made this should feel bad and be arrested, if you liked binding of isaac so much you could've made mods instead of a ripoff that barely classifies as a game. this is bad to a point where it's not even funny, this is like something you'd make in gms within the span of 3 hours, this game should be removed from the store, it's criminal that this costs money. we need another video game crash.

(very exaggerated i apologize). The stand alone mission, 'Joint Venture' which comes with this DLC is highly enjoyable to play with. Highly recommend to the hardcore Tropico fan.. I wasted \$1.99 on this DLC. It won't start on Mac OS X. Supposedly when installed, when you start up the game a menu will come up that will allow you to select the DLC instead of the main game. It doesn't. It does come up on Linux, but it still won't play. Too bad, because the base game is fun.. So far I really like this game. It's a simple game, but it's not pretending to be more than it is. If you normally need a tutorial it can be difficult to figure out at first but once you learn it, it's not bad. The hardest part is figuring the ratio of certain buildings and such to the number of villagers you have, and the best places to put them. there was just an update that changes the way it plays a little, But from what I've seen the developer is very active in his(?) community. I've seen there posts and replies on many screenshots and forum discussions. i don't know what their plans are for the future of the game is, but I believe they try their best to please their players. The game as is is a decent, casual, time waster. I got it on sale, but I feel like the full price is worth it for the kind of game it is.

9/10

-for tricking me into playing it for 4 hours straight when I only meant to play it for an hour.. Awesome game. I hope that they are able to finish and release the other acts in the future. I felt that everything about this game was solid: pixel art graphics, sound, user interface, writing, etc. Definitely one of the better point & click games that I've played lately.. A serviceable isometric/top-down squad combat focused, turn based strategy game. Good, but fairly unremarkable. The harder difficulties offer a decent challenge, and trying to get the best rating for each mission is pretty fun (if you're a perfectionist the game has much more to offer you). As others have said enemy AI is very simplistic, they don't react to noise as much as you'd expect given the nature of the game, don't use cover as much as the game demands, and don't really use teamwork either. Still, adequate for the amount of damage they do (a few shots will see your dudes dead). There's an ironman-type setting (nice that it can be toggled off when you're feeling casual or testing new equipment out), and some limited squad customization (both cosmetics and gear, plus classes that grant abilities as you level up), with items needing to be purchased with money awarded for completing missions.

If you enjoy these kinds of games (or maybe tactical shooters- Tom Clancy style) I'd recommend giving it a shot, otherwise spend your money elsewhere. I wouldn't suggest getting the DLC unless you're dying for more content, it has one new location featuring all game types with a cool virtual reality, Tron-like look to it but enemies will just be red, smooth textured human shapes while friendlies will be normal, or green if you make a squad using the DLC's group (Petrov's Shard).
